

Investment Overview

Four Quadrant Global Real Estate Partners (the "Partnership") has been formed to provide a globally diversified, integrated real estate investment solution of private and public real estate equity and debt. The Manager believes that its ability to invest throughout the capital stack – common equity, preferred equity, mezzanine debt and debt – and through both privately or publicly held vehicles, allows the Partnership to best capitalize on market opportunities and pricing inefficiencies.

The Partnership's objectives are to:

1. Optimize returns by combining the inflation-hedged benefits of real estate equity with the stable and consistent yield of real estate debt.
2. Enhance liquidity with public investments, while minimizing volatility with private investments.

The Partnership is targeting a distribution yield of 5%.

Investment Highlights

The Partnership's investment highlights include:

- access to real estate private equity while also providing liquidity and income,
- similar targeted total returns as REITs, but with lower volatility,
- higher targeted yield than fixed income, but with similar volatility,
- ability to modify allocations to suit different market availability,
- leveraging Hazelview's global, integrated real estate platform and extensive experience, supported by a proven track record.

The Four Quadrants of Real Estate

Adding real estate to a portfolio of equities and fixed income provides diversification that can reduce risk and offers a balance of income and growth. Capital will be allocated across the four quadrants with an increased weighting given to those with the most attractive risk-adjusted return potential.

Target Allocations

Private Equity

- Focuses on value-add opportunities where returns are premised on asset repositioning rather than cap rate compression or multiple expansion
- High targeted returns with low volatility

Private Debt

- Invests in debt secured by real estate or issued by companies that primarily own real estate
- High coupons due to inefficiencies in a marketplace as well as customization of the loan terms

Public Equity

- Targets companies trading at deep discounts to book value with promising growth, not properly valued or with outstanding catalysts that could change their pricing paradigm
- High targeted returns while providing liquidity

Public Debt

- Targets investments in publicly traded debt and debt-like instruments, including preferred shares, convertible debentures, corporate bonds, mortgage investment corporations and mortgage REITs
- High current yields in a very liquid form
